

# 1 on 1 Coaching

---

In my coaching program, you will receive a book your Road Map to Success in PDF format. These pages are full of everything, step by step, you will need to create your at-home business.

As your coach and mentor, I'm committed to your success and will be there for you throughout your entire process absolutely free. All I ask is that you have the drive and commitment to see it through. I won't let you give up on yourself. I know you can do it because I did. You must want to make that dream of raising your kids, retiring early, or sending your children to a great college of their choice. This dream becomes a reality one step at a time and one day at a time. We are in it for the long term. I'm with you every step of the way.

Sound Simple? Well, it is...notice I didn't say it would be Easy. Anything worth building will take time, commitment, and focus. You'll take as much time as you have or need to go through the chapters or you can choose to fast track it. It's entirely up to you. See, this is the beauty of being your own boss.

There are several different ways to go about setting up your new business that will unfold as you learn more. You do not have to know what, when, where or how right at the start. It will unfold organically and may change from time to time. Entrepreneurs are constantly re-inventing ourselves and that's what keeps it fresh and alive. However, the basics don't really change so it's not hard to duplicate. Duplication is the key.

We have regularly scheduled phone appointments where you will check in with your progress and get clarification on questions. Sound good?
